## **DETAILED ACTION**

### ***Note to Applicant***

1. It is suggested that all forms and amendments submitted from this point have the proper application number printed on each page to avoid confusion. Multiple previously submitted forms have application number 10/668,127 printed on them, which is an unrelated application.

### ***Priority***

2. It is noted that this application appears to claim subject matter disclosed in prior Application No. 60/466,378, filed April 29, 2003. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date

Art Unit: 3731

on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

3. If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference

in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

***Oath/Declaration***

4. Applicant has not given a post office address anywhere in the application papers as required by 37 CFR 1.33(a), which was in effect at the time of filing of the oath or declaration. A statement over applicant's signature providing a complete post office address is required.

If the post office address is the *same* as the residence address, applicant is advised to state that it is the same in the proper blank on the declaration.

***Information Disclosure Statement***

5. The information disclosure statement filed October 4, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. The applications that have not been considered are lined out on the IDS.

***Specification***

6. The disclosure is objected to because of the following informalities: On page 10 of the specification, reference numerals 14a and 14b are used interchangeably to describe the inner and outer surfaces of the tip shown in figures 2-5 (see Lines 2, 3 and 23 on page 10).

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Carroll et al. (5,397,324). Carroll et al. reference discloses the invention substantially as claimed, including: a “dissecting tip” (32) engaged to an end effector at a proximal portion, a distal portion with a “first linear section” and a “second linear section,” and a “curved transition section” interconnecting the linear sections. The first linear section is interpreted to be the linear surface of the tip (32) that does not extend beyond the distal tip of the cartridge section (see Figure 4). The second linear section is the linear surface of the tip (32) that extends beyond the distal tip of the cartridge section. The curved transition section is the portion that is curved on the opposite side of the tip from the linear sections and interconnects the linear sections as shown in Figure 4.

Regarding claim 2, the second linear section includes a blunt tip at its distal end (see the extreme left point of the tip in Figure 4).

Regarding claims 3 and 4, the tip is secured to an anvil assembly (2) of an end effector (see Figure 2) and extends distally beyond the distal end of the cartridge assembly (see Figure 4).

Regarding claim 5, the first and second linear sections each include flat inner surfaces, as the linear sections are the flat inner surfaces of the tip of Carroll et al. reference.

Regarding claims 6 and 7, the inner surface of the first linear section is parallel to and spaced from a "distal tissue guide surface" (8) when the tip is engaged to the end effector (see Figure 4).
